

Environmental Policy

The main objective of Bartlett Engineering (South Wales) Ltd is to provide it's customers with products & services that exceed their expectations, whilst continually improving our impact on the environment, preventing pollution & protecting the environment.

Bartlett Engineering (South Wales) Ltd is committed to:

- Complying with the requirements of ISO14001:2015 & any applicable statutory/regulatory requirements.
- Ensuring the performed activities onsite don't pollute the environment.
- Communicating this policy throughout the business & performing environmental awareness training for all employees.
- Reviewing our environmental aspects annually.
- Setting measurable environmental objectives, which will be monitored/reviewed as necessary to ensure continual improvement.
- Identifying opportunities to continual improve our working methods.
- Carrying out internal audits to ensure that the system stays compliant, up to date and any improvements are identified.
- Conducting management review meetings to review the effectiveness of our environmental system & identifying trends/improvement opportunities.
- Ensuring all employees are aware of the environmental procedures in place to reduce our environmental impact.

This policy is communicated throughout the business & reviewed at management review meetings.

The Environment System is promoted throughout the business to enable all employees contribute and benefit from a business that is driven by the philosophy to continually improve.

The policy is maintained as documented information & available to interested parties on request.
